SPOTLIGHT ON: RED Connect Service

CAREL

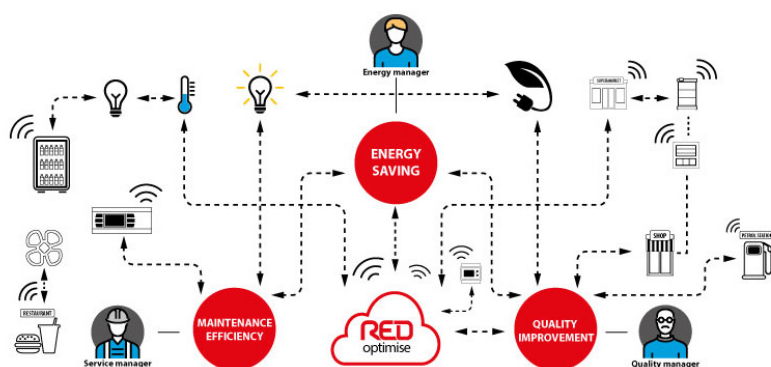

t-store solution

Cyber Security

Enhancing trust through processes and products characteristics according to international standards: ISO/IEC 27001, IEC 62443, ISO 22301, CSA Star and other published by ENISA, NIST, CIS, OWASP, among others

Connect Service – a secure and easy way to monitor and manage local plants remotely.

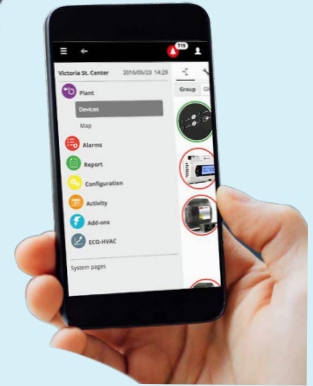

Red Optimise centralises information from individual Boss supervisors, offering a simple and intuitive platform to manage every connected installation. It provides secure remote access with predetermined costs and includes the Connect Service—an easy and reliable way to monitor and manage local plants remotely.

Geolocation enables Red Optimise to provide an intuitive global view of all connected sites. With just a few clicks, users can move from a global overview to detailed information on individual devices. This makes it easy to compare data across sites, identify anomalies requiring attention, and replicate best-performing efficiencies.

For more info, contact your local Eurotec Refrigeration Sales Engineer or give us a call on 09 579 1990 or email sales@eurotec.co.nz

•boss

•boss The complete range for mobile-ready local supervision

Supervisors for small, medium and large sites with built-in Wi-Fi, accessible from all mobile devices

boss always in your pocket:

Responsive web pages offer the possibility to access all boss pages for both programming and everyday operations using mobile devices. The graphics automatically to the device they are displayed on (computers with different screen resolutions, tablets, smartphones), minimising the need for the user to resize the pages and scroll the contents.

Centralised management:

boss synchronises data and alarms with RemotePRO, allowing all connected systems to be monitored from one interface. This makes alarm analysis, service scheduling, and energy optimisation easier by comparing performance across different sites.

Remote service:

Authorised personnel can install printer drivers, copy files, and access operating system functions through a web interface, eliminating the need to travel to site.

Refrigeration applications:

boss not only supervises but also optimises refrigeration units by managing how they interact, improving thermodynamic performance and reducing energy usage. Carel's experience ensures user interfaces are tailored for installers, service technicians, and system managers, making setup and operation simple and fast.

•boss micro panel

Plug&play monitoring solutions with built-in display for systems with up to 30 devices

Complete range of compact solutions for monitoring and optimising the performance of small and medium refrigeration and air conditioning systems.

- Built-in 7" display to monitor system status from a single access point
- Ready-to-install solution without requiring additional wiring and assembly operations
